References for Reading More About Training Transfer
Prepared by: Barbara Carnes, Ph.D.
BCarnes@MakeTrainingStick.com

These are academic journals that outline training transfer research. Most of them are directly related to training transfer. A few of them are indirectly related but are the basis for one or more Techniques To Integrate Education (TIEs) in my books: Making Training Stick, Making Training Stick: A Training Transfer Field Guide, and Making Learning Stick.

Entries are more or less in APA format but some allowances have been taken. For those unfamiliar with academic references, if the entry is a journal article (and most of them are), the volume will be listed after the journal title, the issue will be in parentheses, followed by the page numbers.
